Object : Internship request in International Trade

Currently studying in my last year of Master's Degree in Management and International Business with a focus on SME's at the Institute of Business and Administration in Caen, France. I spent my last semester in Puebla, Mexico and then I did a three-month internship in Santiago, Chile as a Business Developer in a solar energy company. My role was to analyze and identify market opportunities for the installation and sales of solar panels in Colombia.

Before applying for a Master's degree, I obtained a Bachelor in Management specialized in Marketing-Sales. The courses I followed in International Development, Business Strategy, Sales and Negotiations and the Business Plan I realized in my firsts two years of study gave me strong management skills. In addition, my three internships during the past three years have allowed me to gain autonomy and participate actively in the international development of a company. I wish to do my internship in your company, from February 2019 and for a minimum of 5 months in order to implement my knowledge acquired during my five years of studies, my know-how and my experience within a foreign company working internationally.

With a proactive attitude, good analytical skills and the ability to adapt easily in difficult international environments, my goal will be to develop, through this internship in your company, my skills to manage a company on its international approach .

Enclosed is a copy of my resume for your review and I am available at your convenience for an interview. Please feel free to contact me if you require any additional materials.

Thank you for your consideration,

Please accept, Madam and Sir, the expression of my best regards.

Charles
